

ms. **got-it-all-together**

Your lipstick looks almost as good as new, which shows that you're extremely organized and strive for perfection! With your talent for staying on schedule and playing by the rules, you're bound to be successful. Your friends see you as totally together and often ask for your advice.

ms. **easygoing**

The soft, rounded tip of your lipstick shows your light, even application, revealing your easygoing, peaceful nature. You've got plenty of good friends and enjoy sharing your generous heart, your sweet smile and your general sense of calm with the ones you love.

ms. **adventure**

You apply your lipstick very creatively, creating the perfect point in the middle – kind of like the center of attention. Because of your independent nature, you're outgoing and attracted to adventure – especially if it's spur of the moment!

ms. **going places**

You press hard to apply your lipstick, creating a sharp angle — which is a good indicator of your intense drive and passionate nature. Your high spirits make you a people magnet, and you thrive on personal contact and lots of social events, even though you may arrive late because it's tough for you to stay on schedule!

ms. **trustworthy**

You're the real thing. You tell it just like it is – just like your flat-topped lipstick that you most likely apply with a lip brush. Sometimes you can be shy, but you're also a dear, loyal friend that your close friends can count on. You can certainly rise to the challenge, but you're a true romantic underneath that practical exterior.
